Michigan Heart Association

\$754,115... Over three quarters of a million dollars.

It's a sum most of us can't relate to, except when reading about millionaires' wills or the national budget. That's the sum Michigan Heart Association has allocated this year for research into cardiovascular disease--the nation's number one killer. That will cover some 78 different studies in Michigan. Another \$288,421 has been allocated for national research projects sponsored by the American Heart Association, bringing to over \$1 million Michigan Heart's 1976-77 research budget.

Recipients of the 78 grants will be conducting their projects at: the University of Michigan, Wayne State University, Michigan State University, University of Detroit, Oakland University, Ingham Medical Center in Lansing, Sinai Hospital of Detroit, Edsel Ford Institute, Wayne County General Hospital and Henry Ford Hospital.

Grants have been awarded on a priority rating system by Michigan Heart's 26-member research council comprised of practicing physicians, researchers and medical school faculty from throughout the state.

To date, Michigan Heart has allocated more than \$14 million to research both in Michigan and nationally since it began 28 years ago. The Michigan Heart Association is a United Way agency.

Travelers should be careful not to overdo. After a whole day of driving, shopping or sightseeing, you should spend another just relaxing, especially if you're traveling with children.

When flying with children, request seats near the bulkhead that divides the first and tourist class sections. You pay no more, but the youngsters will find more room for playing.

Self Defense Beyond Conservation

Even with maximum energy conservation effort, we will still need nuclear power.

As a nation, we are going to have to face the need for stronger conservation measures to stretch our energy resources. We have to drive our cars less. We have to insulate our homes better. We have to otherwise learn to use energy wisely.

But even with these much needed conservation steps, we must still go ahead and develop both coal and nuclear energy sources. We cannot do without either.

Only the greater use of coal and nuclear energy can help us stop burning up our oil. With vital industries such as petrochemicals and plastics so dependent on oil for their existence, our grandchildren and great grandchildren will be very angry if we've burned up all the oil their generations will need.

Compared to fossil fuels, nuclear power is cleaner—it does not pollute the air—and cheaper. It costs more to build a nuclear plant, but since the fuel costs less, nuclear power is still a net gain over fossil fuel plants.

What about other energy alternatives? I am for exploring them all, but as a physicist and researcher I know that it will be the year 2000 before we have a full-

scale commercial solar power plant on line. That is not to discount the home-heating solar plants already on the market.

So until we see what the year 2000 brings, nuclear power is buying us time: time to continue the basic research that must be done in all fields of energy.

I don't think we can close the door on any one source of energy. We can't turn any option off!

Do you have a question on energy? Write to Edison Electric Institute, 90 Park Ave., New York, N.Y. 10016.

8th Grade Basketball

On Tuesday, January 4th, the 8th grade basketball team had a game against Hamilton. Our team lost, 42-33.

Randy Thomas was the top scorer, making about 14 points.

The team was behind throughout the whole game but the team outscored Hamilton by 9 points in the second half. The coach feels that our team could have played better.

Minutes of Special Meeting Held January 11, 1977 Village of Sparta, Michigan 7:00 P.M. R.C. Burgett, Clerk

Meeting called to order by President pro-tem Sutter.
Members present: Sutter, Beverwyk, Johnson, Bloom, Larson and Polderdyk.

Member absent: President Soderstrom.

Also in attendance were the Algoma Township Board, with a quorum present, and Sparta Township Board, with a quorum present.

Meeting was requested by Moore & Bruggink, Consulting Engineers of Grand Rapids, to arrive at a percentage charge for each unit of Government for a study grant under Act. 329 of Public Acts of 1966, as amended, to expedite the Step 1 study.

Moved by Larson and supported by Polderdyk that the Council approve the Engineering Agreement in the amount of 61.5% of the \$5,200.00 local share of Step 1 study.

Ayes: Polderdyk, Larson, Beverwyk, Johnson, Bloom.

Nays: None.

Meeting was adjourned by president pro-tem Sutter.

William Sutter - President pro-tem

Roy C. Burgett - Village Clerk
