

Examination information pesticide certification

Under current law, pesticide after October 21, 1977, reports Larry Stebbins, Ottawa County Extension Director. The certificate will be issued by the Michigan Department of Agriculture

upon successful completion of examination. The procedure will begin this winter, even though the certificate will not be needed until October. Certificates will be post-dated to provide a full three-year certification.

The reason for the early examination is to allow growers adequate time to prepare for and pass the test in time to buy needed materials next fall. It will also help prevent a rush of applicants just prior to the deadline, explains Stebbins.

The examination, covering the safe, efficient use of pesticides, consists of about 100 multiple choice and true-false questions. It will take about an hour to complete and requires a passing score of 70 percent or better. The test can be repeated any number of times within a year from time of original application and carries no additional charge after the initial examination fee.

MSU Cooperative Extension Service has prepared an extensive manual (Extension bulletin E-1025) to aid growers in preparing to take the exam. It is available through all

county Extension offices. For your copy, call 846-8250, the Ottawa County Extension office in Grand Haven. Cost is .75c each.

The examinations will be given and graded by MDA, but Extension has set up the times and place the exams will be given for Ottawa County.

Ask The Paint Pro

QUESTION: I just finished painting a room and it looks terrible I can see the old color through in places, why?

ANSWER: Usually the problem is too much surface and too little paint, on a porous surface the paint will penetrate carrying it's hiding power and color with it, excessive thinning, poor brush or roller cover or inadequate mixing of paint used.
