

Summer Fluoride Program

Topical applications of fluoride will again be offered to Rockford area children this summer according to Kay Nelson and Carroll Wright, chairwomen of the Rockford's topical fluoride committee. Those students living in the

Belmont area may enroll in the Belmont Clinic.

The fluoride program which is supervised by the Michigan Department of Public Health, in cooperation with the Kent County Health Department, will be made available to preschoolers, second, fifth, and eighth graders and to children referred by dentists. The procedure consists of four visits to the fluoride clinic. The child's teeth are cleaned on the first visit and a fluoride solution is applied directly to the surface of the teeth. The fluoride application only is then repeated during the three succeeding visits. This technique has been shown to reduce tooth decay by about forty per cent compared with the sixty to sixty-five per cent reduction obtained with fluoridated water.

In addition to providing protection against cavities, the program offers a valuable dental experience for children with no discomfort. Dental health education by the clinic personnel, including instruction in the proper method of brushing teeth, also is an important part of the program.

Parents of eligible children will be notified and be given an opportunity to enroll their children in the program. A small fee is charged to cover the cost of operating the clinic.

If you have any questions, please call either Kay Nelson, 874-6615, or Carroll Wright, 874-6566. In Belmont call Josie Larkin, 364-8245.

Maxi-To-Mini

Iris was our Queen for the week with a 2½ pound loss. Mary was our Queen for the year and also our best loser. It was a very close race with Iris coming a close second.

Congratulations to both of them. Margaret kept the mystery box and Norma drew the hair-set, so keep on thinking thin and we hope you can keep them.
